

EASYCRAFT

decorative walls & ceilings

GP traditional style

The possibilities for creating beautiful spaces are endless, with the comprehensive range of traditional Easycraft profiles. Take advantage of Easycraft's quality, durability and flexibility to add flair and function to every setting – dress up walls and ceilings with elegance, add texture and refinement, give timeless charm to restorations, renovations, extensions and new builds.

GP contemporary décor

Take a modern approach to creating exceptional spaces in your home, business, showroom or commercial premises. With the Easycraft range of distinctively contemporary wall and ceiling profiles, you can create stunning effects that lift your work and living environments out of the everyday, bringing your individual ideas to life.

WA wet area interior

An ultra-high moisture resistant material, suitable to use as interior wall and ceiling linings in bathrooms, laundries and kitchens. Durable, versatile and available in all the decorative profile types, you can now continue your design theme throughout your whole home.

SE semi exterior

A hardwood material designed specifically for semi exterior (undercover) applications, such as alfresco, patio, outdoor rooms and bbq areas. Available in most decorative profile types, it is extremely hardy and looks good too.

GP ascot elegance

Give authentic distinction to any room: especially formal dining rooms, master suites, hallways or entry foyers. Combine with an easydado rail, for infinite elegance. Pre-primed with an industrial grade undercoat on both sides, for quick and easy final coat application. The more contemporary ascot.Vogue range presents a sophisticated, well-defined profile.

An easy DIY dado wall makeover to bring your room to life

- 1 Calculate what you need
- 2 Position the panels
- 3 Apply the adhesive and fit
- 4 Add skirting and trims

- 1 To work out how many panels you need, simply measure the wall width, divide it by the panel width then round it up. For a single panel of 1200mm wide and a 2600mm wall, you'll need 3 panels. **Note: The panel widths vary.** Please check panel dimensions above.
- 2 The profile of the panel determines where to begin positioning. For Ascot panels (square profile) position from the centre. For an even number of panels, start with the first panel adjacent to the centreline (position **A**). For an odd number, place the centre of the first panel on the centreline. For other profiles (VJ, Regency) you can start in the corner and work your way out to the final edge and cut to suit. Near corners, doorways or windows, measure the gap and cut panels to fit.
- 3 Simply run a flexible adhesive down the walls allowing a 10mm gap from the floor to the base of the panel. Attach the panels using the easy joining system and use nails top and bottom to hold it secure until the adhesive cures.
- 4 When all the panels are fitted, reattach the skirting boards, add architraves and dado rails as required. You can now finish with your final coat of paint, and sit back and admire your brand new room.

Proudly Australian Made

Our raw GP & WA base materials are produced by Australian Manufacturers using Australian grown timbers. Our products are distributed via a national reseller network including all major hardware stores.

Installation Made Easy

Easycraft panels include the easyjoin system that allows for a fuss free, quick installation. The panels are identified by a Green Tongue for general purpose interior and a Blue Tongue for wet area interior & semi-exterior applications.

PRODUCT LEGEND

- GP** General Purpose Interior
- WA** Wet Area Interior
- SE** Semi-Exterior

All GP, WA & SE products come preprimed ready for final coat application. Note: Length & width dimensions (mm) shown are nominal only. Please check board sizing on delivery. E&O.E.
